EXAMINER'S AMENDMENT

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/21/07 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bryan Diner on 4/11/08.

The application has been amended as follows:

In claim 14, line 2, after "administering", --- to said recipient an effective amount of --- has been inserted.

The following is an examiner's statement of reasons for allowance: When the totality of the art is taken as a whole it is the Examiner's position that the prior art does not teach or suggest, alone or in combination, the instant method of treating a

Art Unit: 1616

hyperacute rejection reaction of a xenograft transplant recipient with the instantly claimed compounds. The art clearly distinguishes between hyperacute rejection and acute rejection. For example, Dr. Paul teaches in the Fundamental Immunology text that acute rejection episodes *are separable* from those of hyperacute rejection by the later timing of their occurrence (end of a week after transplantation for acute rejection), by the prior absences of anti-donor antibody in the recipient and by the cellular infiltrate usually present on biopsy in the absence of vascular thrombosis (page 907, Acute Rejection). In contrast, hyperacute rejection is said to occur within minutes to hours after transplantation (page 906, bottom right column). These differences are illustrated by Dwyer et al. in a flow chart on page 38, figure 4 and clearly shows that hyperacute rejection is distinct from acute rejection (Dwyer et al. page 38, Figure 4).

With respect to the potential interference brought up in the Office Action filed on 3/22/07, the Examiner can only conclude, in light of the discussion above, that the method taught by Williams US 5,688,824 claim 1 (IDS filed on 6/12/07) of preventing or controlling acute or chronic rejection in a xenograft transplantation patient comprising administering to a patient receiving a xenograft a therapeutically effective amount of leflunomide product is distinct from the instantly claimed method and that there is no interference.

Conclusion

Claims 14 and 15 [renumbered as 1 and 2] are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERNST V. ARNOLD whose telephone number is (571)272-8509. The examiner can normally be reached on M-F 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
